

Back to School, Back to Comfort:

August Is the Smart Month to Upgrade Your Air Conditioner to a Heat Pump

Did your air conditioner struggle to keep up with the heavy humidity in June and July? If your system has been limping toward the finish line of summer, you're not alone — and now is the best time to do something about it.

Scheduling your upgrade in August, rather than waiting for the spring rush, is typically faster and more affordable. Manufacture price increases usually come in February or March, and you'll head into fall with a new, efficient heat pump already in place — ready to handle both the last warm days of the season and the heating months ahead.

BACK TO SCHOOL RATE DISCOUNTS

For a limited time, MES is offering back-to-school pricing on new furnace and heat pump system installations. Lock in your savings before the fall rush begins.

→ **Furnace Heat Pump System Discount: Up to \$350.00 plus Manufacture and Utility rebates.**

UTILITY COMPANY REBATES

Depending on your electric utility provider, you may also qualify for additional reduced utility rates on a qualifying heat pump installation. Check the program that applies to your service area below and ask your MES comfort advisor to help you apply.

- **Xcel Energy** — *Up to \$2,000 rebate & Electric Space Heating Rate*
- **Stearns Electric Association** — *Up to \$800 rebate and reduced rate on the Dual Fuel Program*
- **East Central Energy** — *Up to \$1000 rebate and reduced rate on the Load Management Program*
- **Wright Hennepin Co-op** *\$675 rebate when on the Quick Cash Air Source Heat Pump (ASHP) Program*
